Summary

I am an MCA graduate specializing in PHP (Laravel) and Javascript (React), with experience as an Website developer. I am eager to apply my skills and contribute to innovative projects while learning from experienced teams.

Experience

AshasWeb Private Limited – :Laravel Developer Intern

April 2024 – Present

GigFly

- Gigfly serves as a robust online marketplace where freelancers can offer their services and clients can find skilled professionals for various projects.
- Built on the Laravel PHP framework, Gigfly benefits from its MVC architecture, which provides scalability, security, and flexibility for managing user interactions and data.
- The website boasts an intuitive and responsive design, making it easy for both freelancers and clients to navigate, post jobs, submit proposals, and communicate effectively.
- Gigfly integrates a secure payment gateway to facilitate transactions between clients and freelancers, ensuring reliability and trustworthiness in financial dealings.
- Gigfly utilizes MySQL as its database management system. MySQL is chosen for its reliability, performance, and compatibility with Laravel, ensuring efficient storage and retrieval of user data and project information.
- Gigfly features a feedback and rating system where both clients and freelancers can rate each other, ensuring transparency and accountability to maintain high-quality service delivery.

Code Alpha – Virtual Internship

Oct 2023

- Developed and refined web UI designs, resolving issues to ensure a smooth user experience using HTML, CSS.
