Summary

Full Stack Developer with 1.5+ years of experience in developing web and IoT solutions using React.js, TypeScript, Python Flask, Laravel, MQTT, and Raspberry Pi. Skilled in building scalable applications, REST APIs, and real-time device monitoring systems.

Experience

Software Developer | A-1 Fence Products Company Pvt Ltd. October 2024 – Present

- Developed full-stack web applications using React.js, TypeScript, and Python Flask.
- Designed and integrated RESTful APIs to support web applications and connected systems.
- Deployed and managed applications on Raspberry Pi and Linux-based environments.
- Worked with proprietary Sensors for data acquisition and monitoring.
- Implemented real-time device communication using MQTT and Modbus protocols.
- Integrated sensor data with backend services and monitoring dashboards.
- Integrated sensors with VMS (Video Management Systems) through protocol-based communication.
- Collaborated with hardware and software teams to deliver end-to-end IoT solutions.
- Used Git, Postman, and SQLite for development, testing, and version control.

Software Developer | Ambetronics Engineers Pvt. Ltd. August 2024 – October 2024

- Developed and maintained web applications using PHP Laravel and MySQL.
- Built REST APIs for mobile application integration and backend services.
- Managed data processing workflows for device-generated data using MQTT.
- Optimized backend performance, database queries, and data processing pipelines.
- Implemented automated archival and backup jobs for historical data management.
- Added new features, fixed bugs, and enhanced existing portal functionality.

Laravel Developer Intern | AshasWeb Private Limited April 2024 – July 2024

- Developed and maintained a freelance marketplace platform using Laravel, PHP, and MySQL, enabling job posting, proposal management, and client-freelancer collaboration.
- Implemented secure payment integration, user feedback systems, and backend optimizations to improve platform performance, reliability, and user experience.

Personal Projects

- [Vote For Us](#) – PHP-based online voting platform for candidate selection and election management.
- [Food Ordering Website](#) – Web-based food ordering system with order tracking and admin management features.
- [Online Blogging System](#) – Blogging platform for creating, categorizing, and managing online content.
- [Movie Store](#) – ASP.NET MVC application for movie catalog management, search, and filtering.

Education

Hiray Institute of Computer Application (University of Mumbai), MCA in CSE, 2024

Patkar College of Science and Commerce (University of Mumbai), BSc in CSE, 2022

Languages and Skills

- Languages: PHP, Python, JavaScript, TypeScript, SQL
- Frontend: React.js, HTML, CSS, Bootstrap
- Backend: Laravel, Flask, REST APIs
- Database: MySQL, SQLite
- Tools: Git, Postman, Linux
- Other: MQTT, Modbus, Raspberry Pi, ESP32

Achievements

- **Postman Student Expert** : [Certificate](#)

July2024

Gained hands-on experience with API fundamentals and used Postman for API testing, request management, and environment configuration.

Blockchain and its Application

- **Blockchain and its Application** : [Certificate](#)

Apr2023

Performed big data analysis to extract actionable insights from large datasets and support data-driven decision-making.

- **Big data analysis**

Oct2021

Extracted meaningful insights from large and complex datasets to support informed decision-making and improve business outcomes.
